Heavy Duty Driver's License | Police Clearance Certificate

PROFESSIONAL SUMMARY

Zishwili Mayibongwe Cyprian is a registered Medical Laboratory Technologist (Eswatini Medical and Dental Council) with a Bachelor of Science in Medical Laboratory Sciences (Second Class Upper, CGPA 4.36/6.00). Six months of hands-on clinical placement in an ISO 15189-accredited, high-throughput diagnostic laboratory (Cerbera Lancet Eswatini & Eswatini Hospital Laboratory Services), followed by progression from Pre-Analytical Technician and Phlebotomist to Medical Laboratory Technologist at Dimer Laboratories. Experienced across all major laboratory disciplines: haematology, clinical chemistry, microbiology (routine and TB), immunology & serology, blood transfusion, parasitology, cellular pathology, and molecular biology (basics). Certified in phlebotomy, workplace safety, and first aid. Proven ability to operate a wide range of automated analysers, authorize and release results, implement quality control (IQC/EQA), follow strict SOPs, and improve workflow efficiency. Committed to diagnostic accuracy, patient safety, and public health.

EDUCATION

Bachelor of Science in Medical Laboratory Sciences (Second Class Upper) Conferred 28 March 2026

Eswatini Medical Christian University (EMCU) — CGPA 4.36/6.00

Full spectrum coursework: Haematology (I & II, Haempathology), Clinical Chemistry (I, II, III), Medical Microbiology (I, II, Virology & Parasitology), Immunology & Serology, Blood Transfusion Science, Cellular Pathology, Molecular Biology, Medical Genetics, Research Methods, Laboratory Management (QMS, ISO 15189, SOPs).

High School – EGCSE Certificate Nov 2020

Ka-Boyce High School

7 credits including Mathematics and Physical Science.

CERTIFICATIONS & REGISTRATION

- Registered Medical Laboratory Technologist (Provisional Licence) – Eswatini Medical & Dental Council (May 2026)
- Diploma in Phlebotomy (ID: 45878632) – Alison (Feb 2026)
- Diploma in Workplace Safety & Health – Alison (Aug 2025)
- Secretarial Studies & Office Administration – Alison (Aug 2025)
- First Aid Blended Learning (80% pass) – Baphalali Eswatini Red Cross (Nov 2024)
- ISO 15189 Laboratory Quality Management – In-house training (EHLS, 2024)

LABORATORY COMPETENCIES (BY DEPARTMENT)

Haematology & Haemostasis

Peripheral blood smear preparation, staining, and microscopic examination (manual differential); Complete Blood Count (CBC) analysis using automated analysers (Mindray BC-5380, Mindray BC-5800, Act Diff 5); malaria microscopy (thick and thin films); INR and basic coagulation testing; haemoglobinopathy and haemostasis fundamentals (from Haematology II & Haempathology).

Clinical Chemistry

Operation of Beckman Coulter AU480 and Roche Cobas c111/e411 analysers; daily Internal Quality Control (IQC), calibration drift identification and correction; spectrophotometry, colorimetry, alkalinity titration, HPLC principles; hormone assays, tumour markers, therapeutic drug monitoring (basics); blood gas analysis (epoc system – CO₂, O₂).

Microbiology (General & TB)

General: Gram staining, Ziehl-Neelsen (ZN) staining, culture media preparation, bacterial isolation (streaking), antibiotic susceptibility testing (disk diffusion), urine/stool/sputum processing, microscopy for parasites (wet prep, iodine, saline).
TB specific: sputum preparation for GeneXpert molecular testing inside Class II biosafety cabinet; modified AFB

(Ziehl-Neelsen) staining and microscopy for treatment monitoring; rapid TB LAM urine assay; infection control for high-risk specimens.

Immunology & Serology

Rapid diagnostic tests (RDTs): HIV combo, Syphilis (RPR – qualitative and semi-quantitative), HBsAg, TB LAM; operation of Beckman Coulter UniCel DxI 800 and Maglumi 800 immunoassay analysers; ELISA principles, agglutination reactions, complement fixation (academic foundation).

Blood Transfusion Science

ABO and Rhesus blood grouping (manual, QUALYS automated system, and Grifols equipment); cross-matching (major and minor), antibody screening; 3-5% red cell suspension preparation; transfusion reaction investigation basics.

Cellular Pathology & Histology

Tissue processing (fixation, embedding, microtomy); routine staining (H&E) and Papanicolaou (Pap) staining; fine needle aspiration cytology (FNAC) fundamentals (from ML 408 Cellular Pathology).

Molecular Biology & Medical Genetics

DNA/RNA extraction fundamentals, PCR principles, gel electrophoresis; gene sequencing basics (from Medical Genetics), FISH, karyotyping; operation of Panther Hologic (TTI, HPV, COVID-19) and Cobas 4800 (viral load) – placement experience.

Parasitology

Microscopic identification of intestinal parasites (wet preparation, saline and iodine mounts); malaria parasite detection and species identification (training from ML 410).

Laboratory Management & Quality Systems

ISO 15189 quality management system (QMS) fundamentals; Standard Operating Procedure (SOP) adherence and documentation; internal quality control (IQC) and external quality assessment (EQA); sample reception, registration, tracking, archiving using LIMS (AfriLab, Disa, MEDITECH); non-conformance resolution; inventory and reagent stock control; authorization and release of laboratory results in compliance with SOPs and quality standards.

LABORATORY EXPERIENCE

Medical Laboratory Technologist March 2026 – Present

Dimer Laboratories (Manzini)

- Started as Pre-Analytical Technician & Phlebotomist (March–May 2026); promoted to Medical Laboratory Technologist in June 2026.
- Pre-analytical: Performed phlebotomy (4 to 15 patients daily), specimen reception, registration, and processing; maintained sample integrity and LIMS documentation; identified turnaround time delays and initiate an urgent results delivery protocol, improving patient satisfaction and workflow efficiency.
- Haematology & Blood Transfusion: Operated Mindray BC-5800 for CBC and differentials; performed ABO/Rh grouping and cross-matching using Grifols equipment.
- Immunology & Serology: Ran rapid tests (HIV, Syphilis, HBsAg, HSV) and immunoassays on the Maglumi 800 analyser.
- Microbiology: Conducted urinalysis and stool analysis (microscopy, culture, sensitivity).
- Quality & Inventory: Managed daily IQC/EQA, calibration, and troubleshooting; assisted with inventory control and reagent stock management.
- Results Validation: Authorized and released laboratory results in compliance with SOPs and quality standards.

Clinical Attéché (6-Month Rotation Across All Departments) Apr 2024 – Nov 2024

Cerba Lancet Eswatini (Apr–Jul) & Eswatini Hospital Laboratory Services (Aug–Nov) – ISO 15189-accredited, high-throughput diagnostic laboratory

- Sample Management & Data Entry: Received, registered, centrifuged, aliquoted, and archived specimens using LIMS(Disa, MEDITECH) and HMIS.
- Haematology & Blood Transfusion: Performed CBC on Mindray BC-5380 and Act Diff 5; prepared and stained peripheral smears for manual differentials and malaria microscopy. Conducted ABO/Rh grouping (manual and QUALYS), cross-matching, and antibody screening.

- Clinical Chemistry: Operated Beckman Coulter AU480 and Roche Cobas c111/e411; ran daily IQC, corrected calibration drift at EHLS preventing 150+ repeat analyses.
- Microbiology (General & TB): Processed urine, stool, and sputum for routine culture; performed Gram and ZN staining, media preparation, and antibiotic susceptibility testing. In TB laboratory: prepared sputum for GeneXpert inside Class II biosafety cabinet; ensured zero late/incorrect results; monitored treatment response using modified AFB staining and microscopy; performed TB LAM rapid test.
- Immunology & Serology: Executed RDTs for HIV, Syphilis (RPR), HBsAg, and TB LAM. Operated Beckman CoulterUniCel DxI 800.
- Molecular & Specialised Testing: Assisted with viral load testing (Cobas 4800), CD4 analysis (Sysmex CyFlowCounter), HPV and TTI screening (Panther Hologic).
- Quality, Safety & Compliance: Strictly followed SOPs, biosafety (BSL-2), patient confidentiality, and hazardous waste disposal. Participated in non-conformance resolution.

RESEARCH EXPERIENCE

Undergraduate Thesis Approved June 2025

Prevalence of Hepatitis B Virus in Pregnant Women Attending One Antenatal Care Facility in Mbabane

EMCU, Department of Medical Laboratory Sciences | Supervisor: Ms. Mdluli Nomkhosi

- Designed a retrospective cross-sectional study (January 2021 – December 2024).
- Obtained ethical approval from Eswatini Health and Human Research Review Board (EHRRB).
- Collected and analysed data using Microsoft Excel (descriptive statistics, 95% confidence intervals).
- Key findings: 3.5% overall HBV prevalence (95% CI: 0.7%–9.9%), 33.3% HIV-HBV co-infection, 0% vaccination coverage, with the highest risk observed in the 28–37 age group (2.3% prevalence).
- Produced evidence-based public health recommendations to strengthen antenatal care and prevent mother-to-child transmission.

PROFESSIONAL ATTRIBUTES

- Detail-oriented with strong documentation and reporting skills
- Analytical and critical thinking, problem-solving under pressure
- High manual dexterity (phlebotomy, fine laboratory techniques)
- Team collaboration and effective communication across disciplines
- Time management and ability to handle high-volume workloads
- Adaptable and quick learner – mastered new analysers within days
- Strong work ethic, proactive, and committed to continuous improvement
- Dedicated to quality, safety, and patient confidentiality
